Premier Certified Devices

Premier Certified Devices are devices covered by Product and Support relationships between CoreDial and select manufacturers (Polycom, Yealink, and Grandstream). Any new product from these three manufacturers will automatically be brought into CoreDial for Interop Testing. If no issues are noted, we will add that device in the Certified Devices List without a request being necessary from the Partner Community.

Yealink

Series	Supported Models	Tested Firmware
Business IP Phone - SIP T4 Series	T4xS (T41S, T42S, T46S, T48S)	66.84.0.15

Secondary Certified Device

All Secondary Certified Devices have completed the CoreDial device certification program. However we do not have a Product relationship with these manufacturers, so we are limited in our capacity to directly support these devices. Of course our support team will use best efforts to help with any questions you may have related to these devices.
